

BRAND GUIDELINES · VERSION 1.0 · SEPTEMBER 2026

# Blueto Tech

How to use the Blueto Tech logo, colours and type.  
For the team, printers, signage makers and partners.

# The Split B

**A capital B for Blueto, built from three separate pieces: an upright and two rounded halves.**

The even gaps between the pieces make the logo look precise and engineered, which fits a software company. The blue top half brings the Blue from our name into the logo.

**Upright**

Navy #0A1A33

**Top half**

Signal Blue #2F7BFF

**Bottom half**

Navy #0A1A33

The blue always goes on the top half. Never swap the colours around.

# Proportions, clear space, minimum size

## Built on a 64-unit grid

The upright's width is **x**. The gaps are  $\frac{3}{4}$  of **x**, and they must never close up or change width. Always use the master files in marketing/logo. Never redraw the logo.

## Clear space: 2x on every side

Keep text, edges and other logos at least twice the upright's width away from the logo. The shaded bands show the minimum.

Print · min 10 mm · Screen · 32 px · 24 px · small · 16 px · small

## Minimum size

Print the logo at least **10 mm** tall. On screen, use the normal version down to **32 px**. At **24 px and below**, switch to the small version, which has wider gaps so they don't blur together.

## Use the right version for each background

**Primary**  
On white and light backgrounds

**Primary**  
On Ice and pale tints

**Reversed**  
On Navy

**Reversed**  
On black

**All white**  
On Signal Blue

**On a navy square**  
On photos and busy backgrounds

## One-colour print, app icon, profile picture

**Black**

Photocopies, rubber stamps, newspaper ads

**White**

Embroidery, engraving, T-shirts

**Single ink**

Company seal, one-colour print

**App icon**

Gradient square, logo at 66%

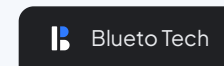

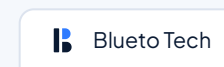

**Profile picture**

WhatsApp, LinkedIn, Google

**Chat list**

Small version

**Browser tab (favicon)**

Small version, 16 px

# Gradient for screens, flat for print

app-icon-gradient

avatar-gradient

**Start · Royal Blue**

#2563EB · RGB 37 99 235 · top-left corner

**End · Navy**

#0A1A33 · RGB 10 26 51 · bottom-right corner

**Top half of the B · Sky**

#7DD3FC · RGB 125 211 252. Signal Blue would disappear against the gradient.

**Upright and bottom half · White**

#FFFFFF

**Direction:** a straight line from the top-left corner to the bottom-right corner (135°), with nothing in between. In CSS: `linear-gradient(135deg, #2563EB, #0A1A33)`

## USE THE GRADIENT

App icon, WhatsApp, LinkedIn and Google profile pictures, website app banners, social posts.

## USE FLAT NAVY

Anything printed, stitched, stamped, painted or engraved. Gradients can't be reproduced there, so use `app-icon.svg`.

## Horizontal and stacked

Horizontal · primary. Use this by default.

Horizontal · reversed

Stacked · posters, sign boards, square spaces

### Name typeface

Sora Bold. The letters are set slightly tighter than normal (–2%).

### Spacing

Always use the master lockup files. Don't re-space the name by eye.

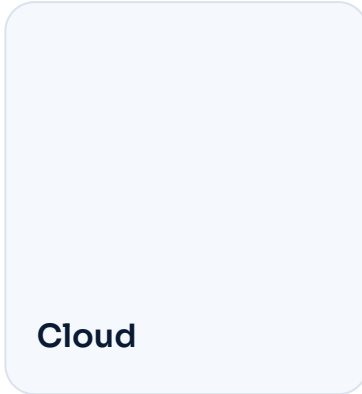

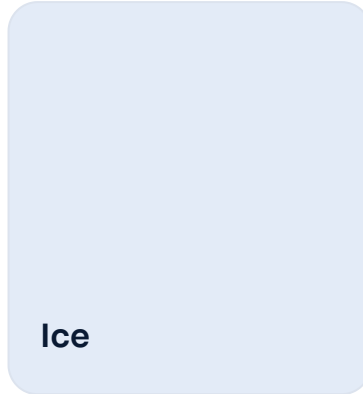

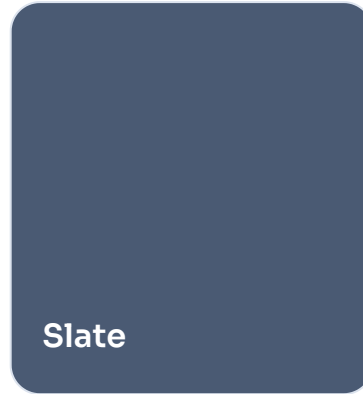

### Height

The name's capital letters are about 60% of the B's height.

### "Pvt Ltd"

Plus Jakarta Sans SemiBold, in spaced capitals. Leave it out where space is tight.

# Palette

|                                                                                   |                                                                                   |                                                                                    |                                                                                     |                                                                                     |

|  |  |  |  |  |
| Navy                                                                              | Signal Blue                                                                       | Cloud                                                                              | Ice                                                                                 | Slate                                                                               |
| HEX #0A1A33                                                                       | HEX #2F7BFF                                                                       | HEX #F5F8FC                                                                        | HEX #E3EBF7                                                                         | HEX #4A5A73                                                                         |
| RGB 10 26 51                                                                      | RGB 47 123 255                                                                    | RGB 245 248 252                                                                    | RGB 227 235 247                                                                     | RGB 74 90 115                                                                       |
| CMYK C80 M49 Y0 K80                                                               | CMYK C82 M52 Y0 K0                                                                | CMYK C3 M2 Y0 K1                                                                   | CMYK C8 M5 Y0 K3                                                                    | CMYK C36 M22 Y0 K55                                                                 |
| Primary. Logo, headlines, dark backgrounds.                                       | Accent. Top half of the logo, links, buttons.                                     | Page backgrounds, reversed text.                                                   | Panels, cards, soft backgrounds.                                                    | Body text and captions.                                                             |

The bar shows roughly how much of each colour to use: mostly Navy and Cloud, with Signal Blue kept small so it stands out. App icons and profile pictures also use a gradient, which is specified on its own page. The CMYK values are converted from the screen colours. Ask the printer for a colour proof before any large print run.

# Typefaces

## HEADLINES · SORA

Aa

**Software for the shops and  
schools of Tamil Nadu.**

Sora SemiBold and Bold · free from Google Fonts · used for headlines, the company name and big numbers

## BODY TEXT · PLUS JAKARTA SANS

Aa

We build billing, school and booking software for local businesses. Every product comes with setup, training and a real person to call. GSTIN 33AAKCB8300P1ZG · +91 63835 64217

Plus Jakarta Sans Regular, SemiBold and ExtraBold · free from Google Fonts · used for body text, buttons, forms and captions

H1 · Sora Bold · 30 pt

# Run your shop, not your spreadsheets

H2 · Sora SemiBold · 18 pt

## Billing that works offline

Body · Jakarta Regular · 11 pt

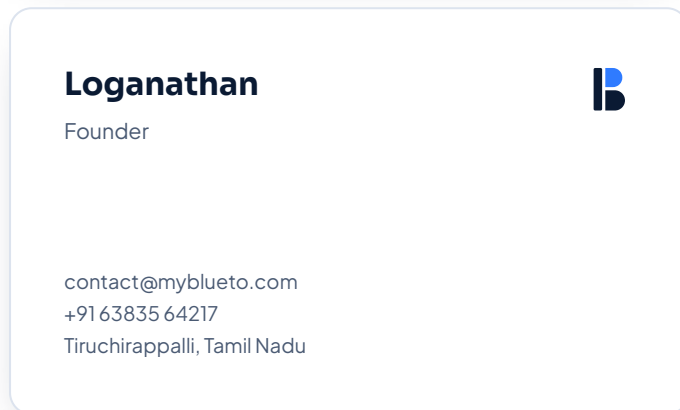

Print a GST invoice in under ten seconds, even when the internet is down.

Label · Jakarta ExtraBold · 8 pt caps

**NEW · SCHOOL FEES MODULE**

If Sora or Plus Jakarta Sans isn't available, for example in Word or PowerPoint, use Arial instead.

## Business card, invoice, sign board

Business card · 90 × 54 mm · front in Navy, back in white

### TAX INVOICE

Invoice # BT-2026-0142 · 25 Sep 2026

Blueto Tech Pvt Ltd · 4/1044, Poorni Homes, Bikshandar Koil, Tiruchirappalli 621216  
GSTIN 33AAKCB8300P1ZG · CIN U72900TN2022PTC153012

Invoice and letterhead header. The primary logo goes top left.

Sign board · Navy background, reversed logo, 2x clear space all round

# Please don't

✗ Don't stretch or squash it

✗ Don't rotate it

✗ Don't swap the colours

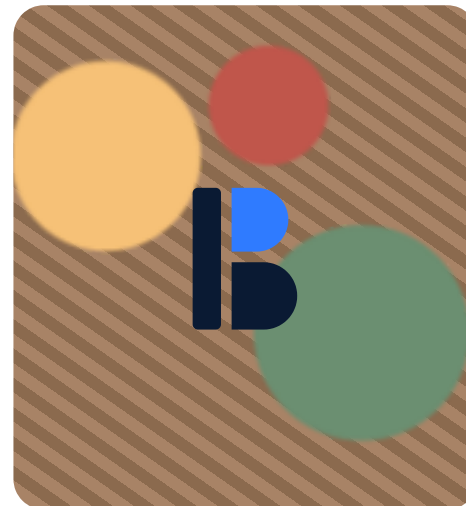

✗ Don't use other colours

✗ Don't close the gaps

✗ Don't add shadows or effects

✗ Don't put it straight on photos

✗ Don't outline it

# Logo files

Every file is in `marketing/logo/`. SVGs are the masters: use them for print, signage and the website. The `png/` folder has transparent PNGs of the same files for documents, slides and uploads. The company name is converted to shapes, so no fonts need to be installed.

## Logo with name
